TAMPA BAY HI-TECH TRAINING PROGRAM

COURSES OFFERED at HCC
Fall Semester Begins August 20th

CISCO Certified Network Associate (CCNA)

The CCNA program prepares students for career opportunities and the CCNA certification exam by teaching the basics of routing, switching and advanced technologies. The CCNA is recognized in the industry as a technical professional working with traditional Cisco-based networks that include LAN and WAN routers and LAN switches.

Microsoft Technology Associate Certification: Networking Fundamentals

Networking Fundamentals is an entry level certification for a fundamental understanding of networking concepts in a Windows Server 2008 environment such as network infrastructures, network hardware, and protocols and services. MTA Certifications will provide the foundational knowledge required to begin building an IT career by using Microsoft technologies.

CompTIA A+ Certification

The CompTIA A+ program is the starting point for an IT career. This certification prepares students to begin their career with learning PC installation, hardware configuration, and troubleshooting with a strong emphasis on Customer Service. The opportunities for advancement and alternate fields are virtually endless.

CompTIA Security+ Certification Training

The CompTIA Security+ program prepares students to apply knowledge of security concepts, tools, and procedures to react to security incidents and they will learn to administer access control and identify management and apply cryptography.

Information Technology Support Specialist

This certificate prepares students for employment as a microcomputer support specialist, help desk specialist, user support analyst, customer service representative, computer operator, computer repair technician, computer sales person, software tester, or user support specialist.

REGISTER NOW!

Are you unemployed?
Interested in a career in IT?
Need assistance paying for school?

The Tampa Bay Hi-Tech Training (HITT) program provides funding for training in the Information Technology and Telecommunications fields.

If you are unemployed and interested in moving up the career ladder in these fields, this program is an excellent opportunity to help cover the cost of your training to earn the necessary certifications employers require before hiring!
Job related opportunities participants could earn with certifications include:

- Network Administrator, Engineer or Specialist
- Project Support Engineer
- Systems Architect
- Web Programmer

AND MANY MORE!

For additional information about the HITT program, including eligibility, visit www.workforcetampa.com and click on the "Tampa Bay Hi-Tech Program" Button, or contact Rachel Gelbmann, Projects Director, at tbhitech@worknetpinellas.org or (727) 608-2479.

For questions regarding HCC's IT certification programs, or about HCC's enrollment requirements, please contact Liz Steacker at esteacker1@hccfl.edu or (813) 259-6522.
